made available in digital form, consisting of text, images, or both, readable on the flat-panel display of computers or other electronic devices. [1] Although sometimes defined as "an electronic devices, but also on any computer or other electronic devices are not expected by the flat-panel display of computers or other electronic devices.
device that features a controllable viewing screen, including desktop computers, laptops, tablets and smartphones. In the 2000s, there was a trend of print and e-books on websites using e-commerce systems. With print books, readers are increasingly
browsing through images of the covers of books on publisher or bookstore websites and selecting and order titles, the e-book can be sent to them online or the
user can download the e-book.[3] By the early 2010s, e-books had begun to overtake hardcover by overall publication figures in the U.S.[4] The main reasons for people buying e-books are possibly lower prices, increased comfort (as they can buy from home or on the go with mobile devices) and a larger selection of titles.[5] With e-books, "electronic
bookmarks make referencing easier, and e-book formats, technical material is especially suited for e-book delivery because it can be digitally searched for keywords. In addition, for programming books, code examples can be copied. [6] The
amount of e-book reading is increasing in the U.S.; by 2014, 28% of adults had read an e-book, compared to 30% owning such devices in 2013.[7] Terminology E-books are also referred to as "ebooks", "e-Books", "e-Books", "e-Books", "e-Books", "e-editions",
or "digital books". A device that is designed specifically for reading e-books is called an "e-reader", "ebook device", or "eReader". History The Readies (1930) Some trace the concept of an e-reader, a device that would enable the user to view books on a screen, to a 1930 manifesto by Bob Brown, written after watching his first "talkie" (movie with
sound). He titled it The Readies, playing off the "talkie".[8] In his book, Brown says movies have outmaneuvered the book by creating the "talkies" and, as a result, reading should find a new medium: A simple reading machine which I can carry or move around, attach to any old electric light plug and read hundred-thousand-word novels in
10 minutes if I want to, and I want to. Brown's notion, however, was much more focused on reforming orthography and vocabulary, than on medium ("It is time to pull out the stopper" and begin "a bloody revolution of the word."): introducing huge numbers of portmanteau symbols to replace normal words, and punctuation to simulate action or
movement; so it is not clear whether this fits into the history of "e-books" or not. Later e-readers never followed a model at all like Brown's; however, he correctly predicted the miniaturization and portability of e-readers. In an article, Jennifer Schuessler writes, "The machine, Brown argued, would allow readers to adjust the type size, avoid paper cuts
and save trees, all while hastening the day when words could be 'recorded directly on the palpitating ether.'"[9] Brown believed that the e-reader (and his notions for changing text itself) would bring a completely new song, as opposed to just
a remix of a familiar song.[9] Inventor The inventor of the first e-book is not widely agreed upon. Some notable candidates include the following: Roberto Busa, S.J. beginning in 1946 and
completed in the 1970s.[10] Although originally stored on a single computer, a distributable CD-ROM version appeared in 1989. However, this work is sometimes omitted; perhaps because the digitized text was a means for studying written texts and developing linguistic concordances, rather than as a published edition in its own right.[11] In 2005,
the Index was published online.[12] Ángela Ruiz Robles (1949) In 1949, Ángela Ruiz Robles, a teacher from Ferrol, Spain, patented on compressed air where text and graphics were contained on spools that users would load onto rotating spindles. Her
idea was to create a device which would decrease the number of books that her pupils carried to school. The final device was planned to include audio recordings, a magnifying glass, a calculator and an electric light for night reading.[13] Her device was never put into production but a prototype is kept in the National Museum of Science and
Technology in A Coruña.[14] Douglas Engelbart and Andries van Dam (1960s) Alternatively, some historians consider electronic books to have started in the early 1960s, with the NLS projects headed by Andries van Dam at Brown
University.[15][16][17] FRESS documents ran on IBM mainframes and were structure-oriented rather than line-oriented dynamically for different users, display hardware, window sizes, and so on, as well as having automated tables of contents, indexes, and so on. All these systems also provided extensive hyperlinking, graphics,
and other capabilities. Van Dam is generally thought to have coined the term "electronic book",[18][19] and it was established enough to use in an article title by 1985.[20] FRESS was used for reading extensive primary texts online, as well as for annotation and online discussions in several courses, including English Poetry and Biochemistry. Brown's
faculty made extensive use of FRESS; for example the philosopher Roderick Chisholm used it to produce several of his books. Thus in the Preface to Person and Object (1979) he writes "The book would not have been completed without the epoch-making File Retrieval and Editing System..."[21] Brown University's work in electronic book systems
continued for many years, including US Navy funded projects for electronic Book Technologies that built DynaText, the first SGML-based e-reader system; and the Scholarly Technology Group's extensive work on the Open eBook
standard. Michael S. Hart (left) and Gregory Newby (right) of Project Gutenberg, at Hackers on Planet Earth (HOPE) Conference, 2006 Michael S. University of Illinois gave Hart extensive computer time. Seeking a worthy use of this resource, he created his first electronic document by typing the United States Declaration of Independence into a computer in plain text. [27] Hart planned to create documents using plain text to make them as easy as possible to download and view on devices. Early
implementations After Hart first adapted the U.S. Declaration of Independence into an electronic document in 1971, Project Gutenberg was launched to create electronic document in 1971, Project Gutenberg was launched to create electronic copies of more texts, especially books. [27] Another early e-book implementation was the desktop prototype for a proposed notebook computer, the Dynabook, in the 1970s at PARC:
a general-purpose portable personal computer capable of displaying books for reading. [28] In 1980, the U.S. Department of Defense began concept development for a portable electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic Aid for Maintenance. Detailed specifications were completed in
FY 1981/82, and prototype development began with Texas Instruments that same year. Four prototypes were produced in 1989 by the U.S. Army Research Institute for the Behavioral and Social Sciences, authored by Robert Wisher and J.
Peter Kincaid.[29] A patent application for the PEAM device,[30] titled "Apparatus for delivering procedural type instructions", was submitted by Texas Instruments on December 4, 1985, listing John K. Harkins and Stephen H. Morriss as inventors. The first portable electronic book, the US Department of Defense's "Personal Electronic Aid to
Maintenance" In 1992, Sony launched the Data Discman, an electronic book reader that could be played on the Data Discman was called The Library of the Future.[31] Early e-books were generally written for specialty areas and a limited audience, meant to be read
only by small and devoted interest groups. The scope of the subject matter of these e-books included techniques, and other subjects.[citation needed] In the 1990s, the general availability of the Internet made transferring electronic files much easier, including e-books.[citation needed] In 1993, Paul
Baim released a freeware HyperCard stack, called EBook, that allowed easy import of any text file to create a pageable version similar to an electronic paperback book. A notable feature was automatic tracking of the last page read so that on returning to the 'book' you were taken back to where you had previously left off reading. The title of this
stack may have been the first instance of the term 'ebook' used in the modern context. [32] E-book formats Reading an e-book formats Reading an e-book formats Reading an e-book formats emerged and proliferated, [citation needed] some garnered support from major software companies, such as Adobe with its PDF format
that was introduced in 1993.[33] Unlike most other formats, PDF documents are generally tied to a particular dimension and layout, rather than adjusting dynamically to the current page, window, or another size. Different e-reader devices followed different formats, most of them accepting books in only one or a few formats, thereby fragmenting the
e-book market even more. Due to the exclusiveness and limited readerships of e-books, the fractured market of independent publishers and specialty authors lacked consensus regarding a standard for packaging and selling e-books. [citation needed] Meanwhile, scholars formed the Text Encoding Initiative, which developed consensus guidelines for
encoding books and other materials of scholarly interest for a variety of analytic uses as well as reading, and countless literary and other works have been developed using the TEI approach. In the late 1990s, a consortium formed to develop the Open eBook format as a way for authors and publishers to provide a single source-document which many
book-reading software and hardware platforms could handle. Several scholars from the TEI were closely involved in the early development of Open eBook as defined required subsets of XHTML and CSS; a set of multimedia formats (others could be used, but there must also be a fallback in one of the required
formats), and an XML schema for a "manifest", to list the components of a given e-book, identify a table of contents, cover art, and so on.[citation needed] This format led to the open format EPUB. Google Books has converted many public domain works to this open format.[34] In 2010, e-books continued to gain in their own specialist and underground
markets.[citation needed] Many e-book publishers began distributing books that were in the public domain.[citation needed] At the same time, authors with books that were not accepted by publishers offered their works online so they could be seen by others. Unofficial (and occasionally unauthorized) catalogs of books became available on the web,
and sites devoted to e-books began disseminating information about e-books to the public.[35] Nearly two-thirds of the U.S. Consumer e-book publishers are: Hachette, HarperCollins, Macmillan, Penguin Random House and Simon & Schuster.[36] Libraries U.S. libraries began to offer
free e-books to the public in 1998 through their websites and associated services, [37] although the e-books were primarily scholarly, technical or professional in nature, and could not be downloaded. In 2003, libraries began offering free downloadable popular fiction and non-fiction e-books to the public, launching an e-book lending model that worked
much more successfully for public libraries.[38] The number of library e-book distributors and lending models continued to increase over the next few years. From 2005 to 2008, libraries experienced a 60% growth in e-book collections.[39] In 2010, a Public Library Funding and Technology Access Study by the American Library Association[40] found
that 66% of public libraries in the U.S. were offering e-books,[41] and a large movement in the library industry began to seriously examine the issues relating to e-book lending, acknowledging a "tipping point" when e-book technology would become widely established.[42] Content from public libraries can be downloaded to e-readers using application
software like Overdrive and Hoopla.[43] The U.S. National Library of Medicine has for many years provided PubMed, a comprehensive bibliography of medical literature. In early 2000, NLM set up the PubMed Central repository, which stores full-text e-book versions of many medical journal articles and books, through cooperation with scholars and
publishers in the field. Pubmed Central also now provides archiving and access to over 4.1 million articles, maintained in a standard XML format known as the Journal Article Tag Suite (or "JATS"). Despite the widespread adoption of e-books, some publishers and authors have not endorsed the concept of electronic publishing, citing issues with user
demand, copyright infringement and challenges with proprietary devices and systems. [44] In a survey of interlibrary loan (ILL) librarians, it was found that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections and that 27% of those libraries held e-books in their collections are considered in the collections and that 27% of those libraries held e-books in their collections are considered in the collection are co
loan for e-books.[45] Patron-driven acquisition (PDA) has been available for several years in public library's catalog is then populated with records for all of the e-books that match the profile.[46] The
decision to purchase the title is left to the patrons, although the library can set purchasing conditions such as a maximum price and purchasing conditions such as a maximum price and purchasing conditions such as a maximum price and purchasing caps so that the dedicated funds are spent according to the library's budget. [46] The 2012 meeting of the Association of American University Presses included a panel on the PDA of books produced by
university presses, based on a preliminary report by Joseph Esposito, a digital publishing consultant who has studied the implications of PDA with a grant from the Andrew W. Mellon Foundation.[47] Challenges Although the demand for e-book services in libraries has grown in the first two decades of the 21st century, difficulties keep libraries from
providing some e-books to clients.[48] Publishers will sell e-books to libraries, but in most cases they will only give libraries a limited license to the title, meaning that the library does not own the electronic text but is allowed to circulate it for either a certain period of time, or a certain number of check outs, or both. When a library purchases an e-
book license, the cost is at least three times what it would be for a personal consumer.[48] E-book licenses are more expensive than paper-format editions because publishers are concerned that an e-book that is sold could theoretically be read and/or checked out by a huge number of users, potentially damaging sales. However, some studies have
found the opposite effect to be true (for example, Hilton and Wikey 2010).[49] Archival storage The Internet Archive and Open Library offer more than six million fully accessible public domain e-books. Project Gutenberg has over 52,000 freely available public domain e-books. Dedicated hardware readers and mobile software Main article: E-reader
See also: Comparison of e-book readers and Comparison of e-book software The BEBook e-reader An e-reader or e-book device, is a mobile electronic device, is a mobile electronic device, is a mobile electronic device, and digital periodicals. An e-reader is similar in form, but more limited in purpose than a tablet. In
comparison to tablets, many e-readers are better than tablets for reading because they are more portable, have better readability in sunlight and have longer battery life. [50] In July 2010, online books for the first time ever during the second
quarter of 2010, saying it sold 140 e-books for every 100 hardcover books, including hardcovers for which there was no digital edition.[51] By January 2011, e-book sales are still much larger than either hardcover or e-book; the American Publishing
Association estimated e-books represented 8.5% of sales as of mid-2010, up from 3% a year before.[53] At the end of the first quarter of 2012, e-book sales in the United States surpassed hardcover book sales for the first quarter of 2012, e-book sales in the United States surpassed hardcover book sales in the United States surpassed hardcover book sales for the first quarter of 2012, e-book sales in the United States surpassed hardcover book sales in the United States surpassed hardcover book sales in the United States surpassed hardcover book sales for the first quarter of 2012, e-book sales in the United States surpassed hardcover book sales in the United States surpassed hardcover book sales for the first quarter of 2012, e-book sales for the first quarter of 2012, e-book sales in the United States surpassed hardcover book sales in the United States surpassed hardcover book sales for the first quarter of 2012, e-book sales in the United States surpassed hardcover book sales in the United 
2013, the FAA allowed use of e-readers on airplanes at all times if it is in Airplane Mode, which means all radios turned off, and Europe followed this guidance the next month.[55] In 2014, The New York Times predicted that by 2018 e-books will make up over 50% of total consumer publishing revenue in the United States and Great Britain.[56]
Applications Reading applications on different devices Some of the major book retailers and multiple third-party developers offer free (and in some third-party developers offer free (and in some third-party developers offer free (and in some third-party cases, premium paid) e-reader software applications (apps) for the Mac and PC computers as well as for Android, Blackberry, iPad, iPhone, Windows Phone and Palm OS devices to allow the
reading of e-books and other documents independently of dedicated e-book devices. Examples are apps for the Amazon Kindle,[57] Barnes & Noble Nook, iBooks, Kobo eReader and Sony Reader. Timeline Before the 1980s c. 1949 Ángela Ruiz Robles patents the idea of the electronic book, called the Mechanical Encyclopedia, in Galicia, Spain. Roberto
Busa begins planning the Index Thomisticus.[11] c. 1963 Douglas Engelbart starts the NLS (and later FRESS) projects, with assistance from Ted Nelson, to develop and use electronic textbooks for humanities and in pedagogy.[16][17] 1971 Michael S. Hart types the US
Declaration of Independence into a computer to create electronic copies of more books. [27] c. 1979 Roberto Busa finishes the Index Thomas Aquinas and of a few related authors. [58]
 1980s and 1990s 1986 Judy Malloy writes and programmes the first online hypertext fiction, Uncle Roger, with links that take the narrative in different directions depending on the read with a stand-alone device.[60] 1990 Eastgate Systems
 launches the Data Discman e-book player.[62][63] 1991 Voyager Company develops Expanded Books, which are books on CD-ROM in a digital format.[64] 1992 The DD-8 Data Discman F. Crugnola and I. Rigamonti design and create the first e-reader, called Incipit, as a thesis project at the Polytechnic University of Milan.[65][66] Apple starts using
its DocViewer[67] format "to distribute documentation to developers in an electronic form",[68] which effectively meant Inside Macintosh books. 1993 Peter James publishes his novel Host on two floppy disks, which at the time was called the "world's first electronic novel"; a copy of it is stored at the Science Museum.[69] Hugo Award and Nebula
Award nominee works are included on a CD-ROM by Brad Templeton.[70] Launch of Bibliobytes, a website for obtaining e-books, both for free and for sale on the Internet.[71] Paul Baim releases the EBook 1.0 HyperCard stack that allows the user to easily convert any text file into a HyperCard based pageable book.[32] 1994 C & M Online is founded
in Raleigh, North Carolina and begins publishing e-books through its imprint, Boson Books; authors include Fred Chappell, Kelly Cherry, Leon Katz, Richard Popkin, and Robert Rodman. More than two dozen volumes of Inside Macintosh are published[72] together on a single CD-ROM in Apple DocViewer format. Apple subsequently switches to using
cost, read/write/erase medium to display e-books.[76] 1997 E Ink Corporation is co-founded by MIT undergraduates J.D. Albert, Barrett Comiskey, MIT professor Joseph Jacobson, as well as Jeremy Rubin and Russ Wilcox to create an electronic printing technology.[77] This technology is later used on the displays of the Sony Reader, Barnes & Noble
Nook, and Amazon Kindle. 1998 Bookeen's Cybook Gen1 NuvoMedia releases the first handheld e-reader, with expandable storage, could store up to 100,000 pages of content, including text, graphics and pictures. [79] The Cybook is sold and manufactured at first by Cytale
Oxford University Press makes a selection of its books available as e-books through netLibrary. Publisher Baen Free Library to make available Baen titles as free e-books on CDs through retailers including Amazon, Barnes & Noble
and Borders Books.[82] 2000s 2000 Joseph Jacobson, Barrett O. Comiskey and Jonathan D. Albert are granted US patents related to displaying electronic books, these patents are later used in the displays for most e-readers.[83] Stephen King releases his novella Riding the Bullet exclusively online and it became the first mass-market e-book, selling
500,000 copies in 48 hours.[84] Microsoft releases the Microsoft releases the Microsoft and Amazon work together to sell e-books that can be purchased on Amazon, and using Microsoft software downloaded to PCs and handhelds. A digitized version of the Gutenberg Bible is made
available online at the British Library [86] 2001 Adobe releases Adobe Acrobat Reader 5.0 allowing users to underline, take notes and bookmark. 2002 Palm, Inc and OverDrive, Inc make Palm Reader e-books available worldwide, offering over 5,000 e-books in several languages; these could be read on Palm PDAs or using a computer application. [87]
 Random House and HarperCollins start to sell digital versions of their titles in English.[citation needed] 2004 Sony Librie, the first e-reader using an E Ink display is released; it has a six-inch screen.[88] Google announces plans to digitize the holdings of several major libraries,[89] as part of what would later be called the Google Books Library
Project. 2005 Amazon buys Mobipocket, the creator of the mobi e-book file format and e-reader software. [90] Google is sued for copyright infringement by the Authors Guild for scanning books still in copyright infringement by the Authors Guild for scanning books still in copyright.
online reader for publisher content.[citation needed] 2007 Size comparison of the Kindle 2 with the larger Kindle DX The International Digital Publishing Forum releases EPUB to replace Open eBook.[93] In November, Amazon.com releases EPUB to replace Open eBook.[93] In November, Amazon.com releases the Kindle 2 with the larger Kindle DX The International Digital Publishing Forum releases EPUB to replace Open eBook.[94] Simultaneously, the
Kindle Store opens, with initially more than 88,000 e-books available. [94] Bookeen launches Cybook Gen3 in Europe; it can display e-books and play audiobooks. [95] 2008 Adobe and Sony Reader PRS-505 in UK and France. 2009 Bookeen
releases the Cybook Opus in the US and Europe. Sony releases the Kindle DX that has a 9.7-inch screen in the U.S. Barnes & Noble releases the Nook e-reader in the US. Amazon releases the Kindle for PC
application in late 2009, making the Kindle Store library available for the first time outside Kindle hardware.[96] 2010s 2010 January - Amazon releases the iPad bundled with an e-book app called iBooks.[98] May - Kobo Inc. releases its Kobo eReader to be sold at
 Indigo/Chapters in Canada and Borders in the United States. July - Amazon reports that its e-book sales outnumbered sales of hardcover books for the first time during the second quarter of 2010.[51] August - Amazon releases the third generation Kindle, available in Wi-Fi and 3G &
Wi-Fi versions. October - Bookeen reveals the Cybook Orizon at CES.[100] October - Kobo Inc. releases an updated Kobo eReader, which includes Wi-Fi capability. November - The Sentimentalists wins the prestigious national Giller Prize in Canada; due to the small scale of the novel's publisher, the book is not widely available in printed form, so the
e-book edition becomes the top-selling title on Kobo devices for 2010.[101] November - Barnes & Noble releases the Nook Color, a color LCD tablet. December - Google launches Google eBooks offering over 3 million titles, becoming the world's largest e-book store to date.[102] 2011 May - Amazon.com announces that its e-book sales in the US now
exceed all of its printed book sales.[103] June - Barnes & Noble releases the Nook Simple Touch e-reader and Nook Tablet.[104] August - Bookeen launches its own e-books store, Bookeen launches its own e-boo
customizable, modular textbook, with no corresponding paper edition.[106] June/November - As the e-readers with the Spanish brand "bq readers". November - Amazon launches the Kindle Fire and Kindle Touch, both devices designed for e-reading
2012 E-book sales in the US market collect over three billion in revenue.[107] January – Apple opens a textbook section in its iBooks bookstore or to be shared as PDF files.[108] January – Apple opens a textbook section in its iBooks bookstore.[109] February – Nature Publishing announces the
worldwide release of Principles of Biology, following the success of the pilot version some months earlier.[106] February - Library.nu (previously called ebooksclub.org and gigapedia.com, a popular linking website for downloading e-books) is accused of copyright infringement and closed down by court order.[110] March - The publishing companies
Random House, Holtzbrinck, and arvato bring to market an e-book library called Skoobe.[111] March – US Department of Justice prepares anti-trust lawsuit against Apple, Simon & Schuster, Hachette Book Group, Penguin Group, Macmillan, and HarperCollins, alleging collusion to increase the price of books sold on Amazon.[112][113] March –
PocketBook releases the PocketBook Touch, an E Ink Pearl e-reader, winning awards from German magazines Tablet PC and Computer Bild.[114][115] June - Kbuuk releases the cloud-based e-book self-publishing SaaS platform[116] on the Pubsoft digital publishing engine. September - Amazon releases the Kindle Paperwhite, its first e-reader with
built-in front LED lights. 2013 April – Kobo releases the Kobo Aura HD with a 6.8-inch screen, which is larger than the current models produced by its US competitors.[117] May – Mofibo launches the first Scandinavian unlimited access e-book subscription service.[118] June – Association of American Publishers announces that e-books now account
for about 20% of book sales. Barnes & Noble estimates it has a 27% share of the US e-book market.[119] June - Barnes & Noble announces its intention to discontinue manufacturing Nook tablets, but to continue producing black-and-white e-readers such as the Nook Simple Touch.[119] June - Apple executive Keith Moerer testifies in the e-book price
fixing trial that the iBookstore held approximately 20% of the e-book market share in the United States within the months after launch – a figure that Publishers Weekly reports is roughly double many of the previous estimates made by third parties. Moerer further testified that iBookstore acquired about an additional 20% by adding Random House in
2011.[120] A Kobo Aura's settings menu Five major US e-book publishers, as part of their settlement of a price-fixing suit, are ordered to refund about $3 for every electronic copy of a New York Times best-seller that they sold from April 2010 to May 2012.[107] This could equal $160 million in settlement charges. Barnes & Noble releases the Nook
Glowlight, which has a 6-inch touchscreen using E Ink Pearl and Regal, with built-in front LED lights. July – US District Court Judge Denise Cote finds Apple guilty of conspiring to raise the retail price of e-books and schedules a trial in 2014 to determine damages. [121] August – Kobo releases the Kobo Aura, a baseline touchscreen six-inch e-reader
September - Oyster launches its unlimited access e-book subscription service. [122] November - US District Judge Chin sides with Google in Authors Guild v. Google, citing fair use. [123] The authors said they would appeal. [124] December - US District Judge Chin sides with Google in Authors Guild v. Google, citing fair use. [123] The authors said they would appeal.
releases the Aura H20, the world's first waterproof commercially produced e-reader.[126] June – US District Court Judge Cote grants class action certification to plaintiffs in a lawsuit over Apple settles the e-book
antitrust case that alleged Apple conspired to e-book price fixing out of court with the States; however if Judge Cote's ruling is overturned in appeal the settlement would be reversed. [128] July – Amazon launches Kindle Unlimited, an unlimited-access e-book and audiobook subscription service. [129] 2015 June – The 2nd US Circuit Court of Appeals
with a 2:1 vote concurs with Judge Cote that Apple conspired to e-book price fixing and violated federal antitrust law.[130] Apple appealed the decision. June – Amazon releases the Kindle Paperwhite (3rd generation) that is the first e-reader to feature Bookerly, a font exclusively designed for e-readers.[131] September – Oyster announces its
unlimited access e-book subscription service would be acquired by Google.[132] September – Malaysian e-book company, e-Sentral, introduces for the first time geo-location distribution technology for e-books via bluetooth beacon. It was first demonstrated in a large scale at Kuala Lumpur International
Airport.[133] October - Amazon releases the Kindle Voyage that has a 6-inch, 300 ppi E Ink Carta HD display, which was the highest resolution and contrast available in e-readers as of 2014.[134] It also features adaptive LED lights and page turn sensors on the sides of the device. October - Barnes & Noble releases the Glowlight Plus, its first
 waterproof e-reader.[135] October - The US appeals court sides with Google instead of the Authors' Guild, declaring that Google did not violate copyright law in its book scanning project.[136] December - Playster launches an unlimited-access subscription service including e-books and audiobooks.[137] By the end of 2015, Google Books scanned
more than 25 million books.[9] By 2015, over 70 million e-readers had been shipped worldwide.[9] 2016 March - The Supreme Court of the United States declines to hear Apple's appeal against the court's decision of July 2013 that the company conspired to e-book price fixing, hence the previous court decision stands, obliging Apple to pay $450
million.[138] April - The Supreme Court declines to hear the Authors Guild's appeal of its book scanning case, so the lower court's decision stands; the result means that Google can scan library books and display snippets in search results without violating US copyright law.[139] April - Amazon releases the Kindle Oasis, its first e-reader in five years
to have physical page turn buttons and, as a premium product, it includes a leather case with a battery inside; without including the case, it is the lightest e-reader on the market to date. [140] August - Kobo releases the Aura One, the first commercial e-reader with a 7.8-inch E Ink Carta HD display. [141] By the end of the year, smartphones and
tablets have both individually overtaken e-readers as methods for reading an e-book, and paperback book sales are now higher than e-book market declined 16.9% in the first nine months of 2016 over the same period in 2015, and
Nielsen Book determines that the e-book market had an overall total decline of 16% in 2016 over 2015, including all age groups. [143] This decline is partly due to widespread e-book price from $6 to almost $10. [144] February – The US version of Kindle Unlimited comprises
more than 1.5 million titles, including over 290,000 foreign language titles.[145] March – The Guardian reports that allows agency pricing.[142]
April – The Los Angeles Times reports that, in 2016, sales of hardcover books were higher than e-books for the first Kindle to be IPX8 rated meaning that it is water resistant up to 2 meters for up to 60 minutes; it is also the first Kindle to enable white text on a black background
a feature that may be helpful for nighttime reading.[146] 2018 January - U.S. public libraries report record-breaking borrowing of OverDrive e-books over the 2017 figure.[147] October - The EU allowed its member countries to charge the same
disadvantages. The most popular e-readers[150] and their natively supported formats are shown below: Reader Native e-book formats Amazon Kindle and Fire tablets[151] AZW, AZW3, KF8, non-DRM MOBI, PDF, PRC, TXT Barnes & Noble Nook and Nook Tablet[152] EPUB, PDF Apple iPad[153] EPUB, IBA (Multitouch books made via iBooks Author)

produced simultaneously with the production of a printed format, as described in electronic publishing, though in many instances they may not be put on sale until later. Often, e-books are produced from pre-existing hard-copy books, generally by document scanning, sometimes with the use of robotic book scanners, having the technology to quickly
scan books without damaging the original print edition. Scanning a book produces a set of image files, which may additionally be converted into text from a keyboard. Sometimes only the electronic version of a book is produced by
the publisher.[example needed] It is possible to release an e-book chapter by chapter as each chapter is written.[example needed] This is useful in fields such as information technology where topics can change quickly in the months that it takes to write a typical book. It is also possible to convert an electronic book to a printed book by print on
demand. However, these are exceptions as tradition dictates that a book be launched in the print format and later if the author wishes an electronic version is produced. The New York Times keeps a list of best-selling e-books, for both fiction[161] and non-fiction. [162] Reading data All of the e-readers and reading apps are capable of tracking e-books.
reading data, and the data could contain which e-books users open, how long the users spend reading data collected from over 21 million of its users worldwide. Some of the results were that only 44.4% of UK readers finished the bestselling
e-book The Goldfinch and the 2014 top selling e-book in the UK, "One Cold Night", was finished by 69% of readers; this is evidence that while popular e-books are being completely read, some e-books are being completely read, and the being completely read, are being completely read, are being completely read, are being comple
that a comparably sized physical book takes up, an e-reader can contain thousands of e-books, limited only by its memory capacity. Depending on the device, an e-look may be readable in low light or even total darkness. Many e-readers have a built-in light source, can enlarge or change fonts, use text-to-speech software to read the text aloud for
visually impaired, elderly or dyslexic people or just for convenience. [165] Additionally, e-readers allow readers to look up words or find more information about the topic immediately using an online dictionary. [166] [167] [168] Amazon reports that 85% of its e-book readers look up a word while reading. [169] Printed books use three times more raw
materials and 78 times more water to produce when compared to e-books.[170] A 2017 study found that even when accounting for the emissions created in manufacturing the e-reader device, substituting more than 4.7 print books a year resulted in less greenhouse gas emissions than print.[171] While an e-reader costs more than most individual
books, e-books may have a lower cost than paper books.[172] E-books may be made available for less than the price of traditional books using on-demand book printers.[173] Moreover, numerous e-books are available for less than the public domain in
the United States, which enables websites to host ebook versions of such titles for free.[175] Depending on possible digital rights management, e-books (unlike physical books) can be downloaded without incurring an additional cost from
the distributor. Readers can synchronize their reading location, highlights and bookmarks across several devices.[176] Disadvantages The spine of the printed book is an important aspect in book design and of its beauty as an object There may be a lack of privacy for the user's e-book reading activities; for example, Amazon knows the user's identity.
what the user is reading, whether the user has finished the book, what page the user is on, how long the user has spent on each page, and which passages the user may have highlighted.[177] One obstacle to wide adoption of the e-book is that a large portion of people value the printed book as an object itself, including aspects such as the texture,
smell, weight and appearance on the shelf.[178] Print books are also considered valuable cultural items, and symbols of liberal education and the humanities.[179] Kobo found that the more expensive the book is, the more likely the reader would at least open
the e-book.[180] Joe Queenan has written about the pros and cons of e-books: Electronic books are ideal for people who value the information contained in them, or who have vision problems, or who have storage and clutter issues, but they
are useless for people who are engaged in an intense, lifelong love affair with books. Books that we can smell; books that we can smell the constant that we can sme
book readers who complain about eyestrain, lack of overview and distractions could be helped if they could use a more suitable device or a pplication, but when they buy or borrow a DRM-protected e-book, they often have to read the book on the default device or application, even if it has insufficient functionality.[182]
While a paper book is vulnerable to various threats, including water damage, mold and theft, e-books files may be corrupted, deleted or otherwise lost as well as pirated. Where the ownership of a paper book is fairly straightforward (albeit subject to restrictions on renting or copying pages, depending on the book), the purchaser of an e-book's digital
file has conditional access with the possible loss of access to the e-book due to digital rights management provisions, copyright issues, the provider's business failing or possibly if the user's credit card expired. [183] Market share United States According to the Association of American Publishers 2018 annual report, ebooks accounted for 12.4% of the
total trade revenue.[184] Publishers of books in all formats made $22.6 billion in print form and $2.04 billion in e-books, according to the Association of American Publishers of books in all formats made $22.6 billion in print form and $2.04 billion in print form and $20.04 billion in print form
12.0% Spain In 2013, Carrenho estimates that e-books would have a 15% market share in Spain in 2015.[187] UK According to Nielsen Book Research, e-book share went up from 20% to 33% between 2012 and 2014, but down to 29% in the first quarter of 2015. Amazon-published and self-published titles accounted for 17 million of those books
(worth £58m) in 2014, representing 5% of the overall book market and 15% of the digital market. The volume and value sales, although similar to 2013, had seen a 70% increase since 2012.[188] Germany The Wischenbart Report 2015 estimates the e-book market share to be 4.3%.[189] Brazil The Brazilian e-book market is only emerging. Brazilians
are technology savvy, and that attitude is shared by the government. [189] In 2013, around 2.5% of all trade titles being sold as e-books. [189] China The Wischenbart Report
2015 estimates the e-book market share to be around 1%.[189] Public domain books Main article: Public domain books are those whose copyrights have expired, meaning they can be copied, edited, and sold freely without restrictions.[190] Many of these books can be downloaded for free from websites like the Internet Archive, in
formats that many e-readers support, such as PDF, TXT, and EPUB. Books in other formats may be converted to an e-reader-compatible format using e-book writing software, for example Calibre.
